PROFILE

AI chatbot and agent specialist with over 20 years of experience in SQL, databases and systematic troubleshooting, from a Ukrainian bank to the Danish agricultural sector. I specify, test and quality-assure AI-driven products, including a live Telegram job-search bot built with Google Gemini, where I found and fixed several real quality issues in the AI's output before launch. Strong at spotting where data or AI logic does not add up, and at turning complex requirements into concrete, testable solutions.

I work hands-on with agentic AI development tools (Claude Code) to specify, build and test complete solutions on my own: from idea to a live Telegram bot with a database, AI integration and automated background logic in days rather than weeks. Quality stays under control throughout: requirements are defined precisely, output is tested systematically, and errors in the AI's logic are caught and fixed before anything goes into production.

AI PROJECTS

- **AI Job Search Assistant with Verify** Live Telegram bot that scores vacancies against the user's CV, writes tailored applications as PDF and checks every letter with Verify, a built-in fact-checker for claims not supported by the CV. Danish and English versions. Python · Gemini API · Telegram · Railway
- **AI Real Estate Bot + Agent Dashboard** Working prototype Telegram bot for buying, renting and selling in Toronto and Calgary; every inquiry lands in a dashboard with lead status, temperature and next action. Python · Gemini API · Telegram
- **AI Daily Planner** In testing Telegram reminder bot that understands tasks written in plain language: step-by-step task wizard, recurring tasks, snooze options and escalating reminders, plus a web dashboard kept in sync with the bot. Python · Gemini API · Telegram · web dashboard
- **Website chat assistant demos** Demos Clickable demos for a fitness centre (NordPuls) and a health food store (Sundt Liv), with sales flyers for local businesses.
- **Family Receipt Tracker** Concept AI reads photographed receipts for a shared family budget, warranty reminders and personal inflation.

WORK EXPERIENCE

IT Developer, Breeding & Genetics

Dec 2024 – Mar 2026

Landbrug & Fødevarer F.m.b.A. (Danish Agriculture & Food Council), Aarhus · intern, then fixed-term employee

- Identified and fixed a data quality error affecting approx. 20% of the rows in a central register.
- Developed a unified periodic JOIN algorithm (overlapping intervals), now used by the IT team in the system's objects.
- Developed and adapted approx. 100 database objects in Oracle.
- Central developer role in the OVERLEVELSE (Survival) project: built two complete, fully operational model variants; the work was described as "brilliant" by the chief scientist.
- Diagnosed and solved performance problems: query time reduced from 2 minutes to 1 second.
- Co-author in the KS distribution project; delivered SQL extracts as the data basis for scientific work.
- Wrote technical documentation and architecture diagrams in Danish in Confluence.

IT Intern, Data Consultant (developer)

Apr 2024 – Jul 2024

Aarhus Municipality, Digital Foundations, Aarhus

- Developed T-SQL scripts (procedures and reports) for the municipality's systems.
- Data loads and changes (CRUD) in the user database of the course portal Eloomi (approx. 30,000 users).
- Migrated existing PowerShell scripts to Python.

Software Developer Jan 2000 – Feb 2022

Prominvestbank, Kyiv, Ukraine

- Advanced from deputy head to head of the Statistical Reporting Department.
- Programmed in Borland C for the bank's core system; part of the daily core programs was developed personally by me.
- Developed in Oracle, Microsoft SQL and Sybase for mandatory reporting to the National Bank of Ukraine and the Deposit Guarantee Fund.
- Organised the entire technical process of submitting reports to the National Bank of Ukraine.
- Designed and implemented the entire daily workflow in PowerBuilder.

EDUCATION

Bachelor's degree, Computer Science · Taras Shevchenko National University of Kyiv, Ukraine 1995 – 2000

COURSES AND CERTIFICATIONS

- Oracle BI Suite EE 10g R3: Create Reports and Dashboards (2015)
- Oracle Database 11g: Analytic SQL for Data Warehousing (2015)
- Oracle Database 11g: Data Warehousing Fundamentals (2015)

SKILLS

AI & QA	AI-driven products, agentic development (Claude Code), Gemini API, Telegram bots, prompt engineering, software quality assurance
Databases	SQL, Oracle Database, PL/SQL, Microsoft SQL Server, T-SQL, Sybase (ASA/ASE), data warehousing
Development	Borland C, PowerBuilder, Python (basic level)

LANGUAGES

English	Fluent
Danish	Good (intermediate)
Ukrainian	Native
Russian	Native
French	Beginner
